## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 5-7 and 11-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Tamatsuka for reasons of record in the Office Action dated 07/18/05 (see paragraph 5).

### ***Response to Arguments***

3. Applicant's arguments filed 10/13/06 have been fully considered but they are not persuasive with respect to independent claims 5 and 11, as well as claims dependent thereon. Applicant first argues that the applied prior art fails to teach the explicit process limitations recited in the instant claims. This is not persuasive, however, since applicant is here claiming a product and not a process. It is well established that product-by-process claims define a product and not a process. Absent evidence demonstrating that the recited process steps produce a product which is materially different than that applied prior art, the process steps are not entitled to patentable weight. The applied prior art meets each and every structural limitation recited in the present claims and, accordingly, anticipates the present claims. Thus, this argument is not persuasive.

4. Next, applicant argues that recited process steps produce a product which is materially different than the applied prior art regarding small COP defects and the ratio of the maximum to minimum of the BMD distribution. To this end, applicant relies on evidence contained in the

Art Unit: 1775

original filed specification. As initial matter, the Examiner notes that these limitations do not appear in the claims at issue. It is the claims and not the specification which define the invention. Limitations may not be read from the specification into the claims in an effort to establish patentability. Moreover, the evidence relied on by applicant is not commensurate in scope with the claimed invention. Thus, since the evidence does not speak to the full scope of the recited process steps, it is not sufficient to demonstrate patentability.

5. In light of the above, applicant's arguments have been fully considered but are not found to be persuasive.

*Allowable Subject Matter*

6. Claims 1-4 and 8-10 are allowed.

*Conclusion*

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
